

PRESENTATION

Presented By: Bushra

Tool: Tableau Desktop

Project Overview

This project analyzes hotel booking data to understand customer booking behavior, revenue trends, cancellations, booking channels, and operational performance. An interactive Tableau dashboard was developed to transform raw booking data into meaningful business insights for better decision-making.

Problem Statement

- Hotels generate large amounts of booking data, making it difficult to identify business trends manually.
- **The project aims to answer questions such as:**
 1. Which hotel receives more bookings?
 2. What is the cancellation rate?
 3. Which booking channels perform best?
 4. Which customer types generate more business?
 5. How does revenue change over time?

Objectives

- Analyze hotel booking trends.
- Monitor revenue performance using ADR.
- Measure cancellation rate.
- Identify top booking channels.
- Analyze customer booking behavior.
- Build an interactive dashboard for business decisions.

Dataset Information

- Dataset Name:
 - Hotel Booking Demand Dataset
 - Key Fields
 - Hotel
 - Country
 - Arrival Date
 - ADR
 - Reservation Status
 - Customer Type
 - Market Segment
 - Deposit Type
 - Distribution Channel
 - Lead Time
 - Adults
 - Weekend Nights
 - Week Nights
- 

Tableau Features

- Calculated Fields
 - LOD Expressions
 - Parameters
 - Hierarchy
 - Groups
 - Bins
 - Dashboard Filters
 - Navigation Buttons
 - Filter Actions
 - Highlight Actions
 - Story
 - KPI Cards
- 

Dashboard 1

Executive Overview

- **KPIs**
- Total Bookings
- Total Revenue
- Cancellation Rate
- Average Stay
- **Visualizations**
- Monthly Booking Trend
- Hotel Type Performance
- Booking Cancellation Analysis
- Country Wise Bookings Map

Dashboard 2

Customer & Booking Analysis

KPIs

- Average Lead Time
- Average ADR
- Repeat Guest Rate
- Average Special Requests

Visualizations

- Market Segment Analysis
- Lead Time Distribution
- Meal Type Analysis
- Reservation Status Analysis

Dashboard 3

Revenue & Performance Analysis

KPIs

- Average Weekend Nights
- Average Week Nights
- Average Waiting List Days
- Average Adults per Booking

Visualizations

- ADR Trend
- Deposit Type Analysis
- Distribution Channel Analysis
- Customer Type Analysis

Business Insights

- City Hotel received the highest number of bookings.
- Direct and TA/TO channels generated most bookings.
- Customer booking behavior varied across segments.
- ADR changed significantly across months.
- Cancellation trends helped identify operational improvements.

Conclusion

The Tableau dashboard converts hotel booking data into interactive business insights. It enables hotel management to monitor KPIs, analyze customer behavior, improve pricing strategies, reduce cancellations, and support data-driven decision-making.

**THANK
YOU**
